Dear Parents and Carers

White Rose Maths Resources

During our recent survey on our Remote Education provision, a number of parents commented that they found the White Rose maths videos useful when completing the set work with their child.

To help families continue providing this support at home, each class teacher will post a White Rose video the day before a concept is taught in school, so that your child can watch them before the lesson for some pre-learning if you would like them to, or afterwards to consolidate and reinforce their learning.

Your child will not be required to complete any written questions as they watch a video but this opportunity will allow them to have a preview of the skills required for the lesson. This will help them to become familiar with the concept they will be taught and should also help to develop their confidence and engagement within maths. The children may come up with some questions they would like to ask their teacher, when the lesson is taught!

The White Rose scheme of work for maths is organised into blocks of work across the year and they have now produced a range of work booklets for parents and children to support each block. There is one booklet for each of the blocks for Y1 to Y6. These will be uploaded onto Google classroom at the start of each block and they are also available to download at no cost on Amazon for the Kindle.

Easter Work

Maths and English resources are available on Google Classroom, if you wish to make use of them.

Yours sincerely

Miss McGroarty
Deputy Headteacher/Maths Subject Leader
